

European Creators' Lab
Europe's exclusive Training for artistic VR/AR Creators and 360° Filmmakers

CALL FOR APPLICATIONS

(PLEASE SHARE)

Immersive technologies are still evolving and changing at a breath-taking tempo, but the real challenge for creators is to understand the new grammar of spatial and sensorial narratives.

Still at the stadium of research and discovery international artists are already providing exciting and sparkling experiences, VR installations, VR and AR artwork, enchanting CinematicVR films and are pushing the boundaries of interactive and non-linear storytelling.

FOR WHOM?

The European Creators' Lab is tailored for writers, directors, VR/AR developers, game designers, programmers, 360° filmmakers, techies, creative producers, journalists, media enthusiasts, artists and everyone with a solid professional background and a large portion of curiosity and open-mindedness.

WHAT WILL WE DO?

We will focus on storytelling, content development and the creative challenges of immersive worlds. The 5-day training will be packed with intensive expert sessions, keynotes and hands-on workshops. It is a safe space to learn, explore, experiment and collaborate - in a totally competitive-free, multidisciplinary, creative environment.

We are proud to welcome and work with some of the best creators as mentors: **Lena Fischer, Hsin-Chien Huang, Tupac Martir, Elisabeth Mayer, Fabrizio Palmas, Michel Reilhac, Tamiko Thiel, Sara Lisa Vogl, Benjamin de Wit** and more to come.
